

Create Proof for Book Project

It is recommended to create proofs of your photo book pages, to preview how sharp and detailed your photos will be printed out; based on the quality of the photos used.

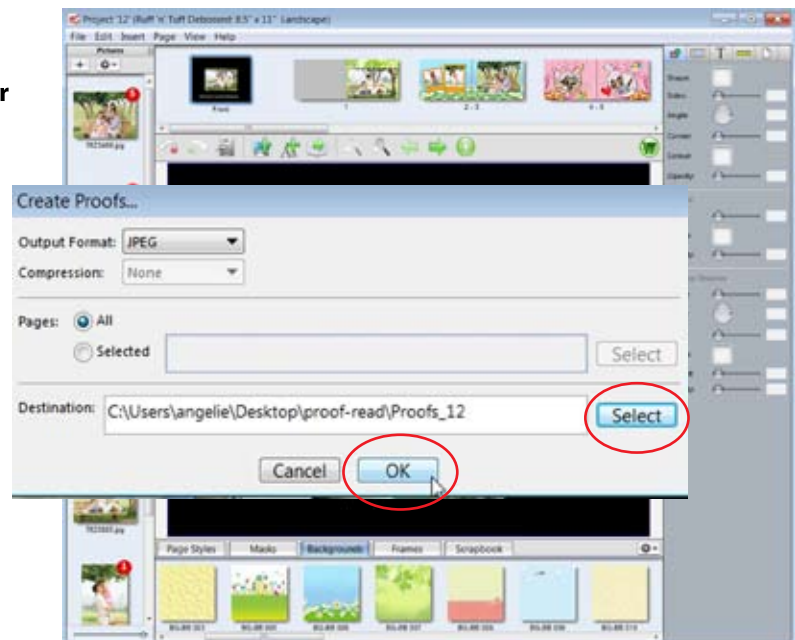

Step 1

To create the proofs, on the Menu Bar click **File > Create Proofs...**

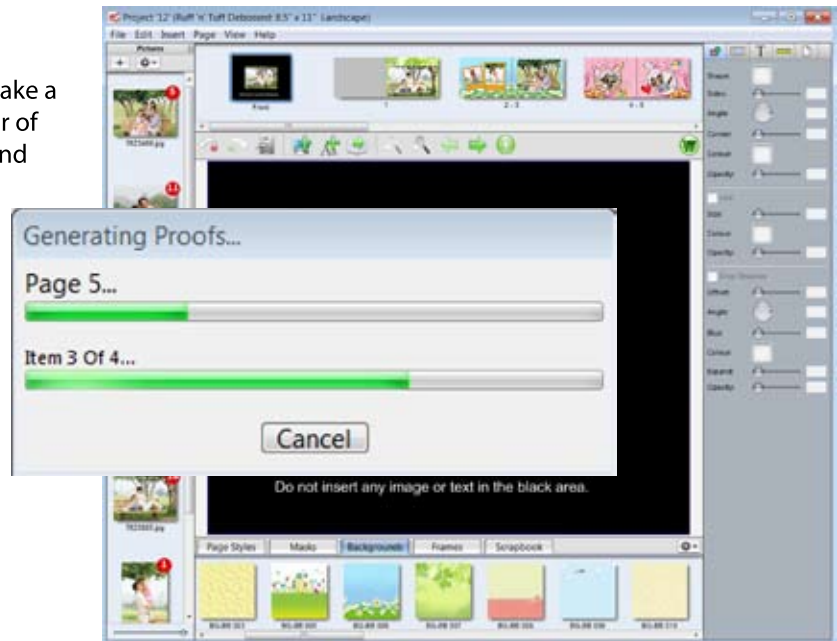

Step 2

Click **Select > Choose a destination folder to save your proofs in > Name your file > Save > OK**

Step 3

Proofs will now be generated. This will take a minute or so, depending on the number of pages, the file size of the photos used and the speed of your computer.

Step 4

The folder destination you saved your proofs in, will automatically open.

Click to open the folder. You can now view your proofs.
